

SkySafari Notes for the ESP 2015 Observing Lists

The 2015 ESP Telescope and Binocular Programs contain a large number of asterisms that are not included in the SkySafari database. As a result, after importing the skylist files for these observing programs (*ESP 2015 - Mis Amigos Imaginarios.skylist* or *ESP 2015 - Binormous.skylist*) you may notice that not all of the objects on the lists will show up in SkySafari.
